# Friends School

THE FRIENDS SCHOOL is a coeducational day school for Kindergarten, Primary, Intermediate, and High School pupils. The school was established in 1883 by its present principal and from a very small beginning has grown into a school of over four hundred pupils with thirty-three teachers. The school is non-sectarian, but strives in a quiet way to apply to daily school life the principles of Christianity.

## PREPARATION FOR COLLEGE

Graduates of this school have entered by examination, certificate, or a combination of the two, more than thirty-five different colleges and technical schools. (A list of pupils and the colleges for which they have been prepared is given on pages 24-29.) The certificate of the Friends School is accepted by those colleges which admit on certificate. It is granted to a graduate in those subjects in which he has made an average of 80 in midyear and final examinations during the last two years of the course. The tendency, however, especially among eastern colleges, is to require applicants for admission to pass the examinations of the College Entrance Examination Board. This school has had long and successful experience in preparing pupils for these examinations and urges all college preparatory pupils to take them in order that they may have a wider choice of colleges.

## ADMISSION

Pupils from schools of recognized standing bringing certificates of good records and a careful statement of work covered may be

admitted without examination. In the case of others, a tentative classification, based upon an interview, will be made, with the understanding that prompt readjustment will follow when necessary.

It is desirable, though not essential, that a new pupil be introduced by a patron or a person known to the principals. Each applicant for admission must furnish a certificate of good standing in conduct and studies in the last school attended. Application for admission should be made as early as possible.

In order to bring about an agreement in aim and purpose between the home and the school, parents are invited to visit the school, to observe the work of classes or to interview the teachers when they are not engaged with class duties. Engagements for interviews should be made in advance by telephone.

The peculiarities or weaknesses of children should be frankly stated by parents at the time that application for admission is made, so that the Principals may decide whether it is to the interests of both parties to receive the applicant, and, if so, how his needs may best be met.

## **BUILDINGS AND EQUIPMENT OF CITY SCHOOL**

The City School provides a quiet study hall, classrooms, laboratories, art and manual training rooms, lunchrooms, and offices, all well lighted, well equipped for their needs, and attractively furnished. The Primary School has its separate building.

### **LABORATORIES, LIBRARY, AND EQUIPMENT**

The chemical and physical laboratories are equipped in a modern manner.

The school is well supplied with pictures, lantern slides, microscopes, maps, charts, mathematical instruments, weights, measures, minerals, and objects for nature study.

There are dictionaries, atlases, and encyclopedias in every study room, besides a good reference library of about 1,500 volumes.

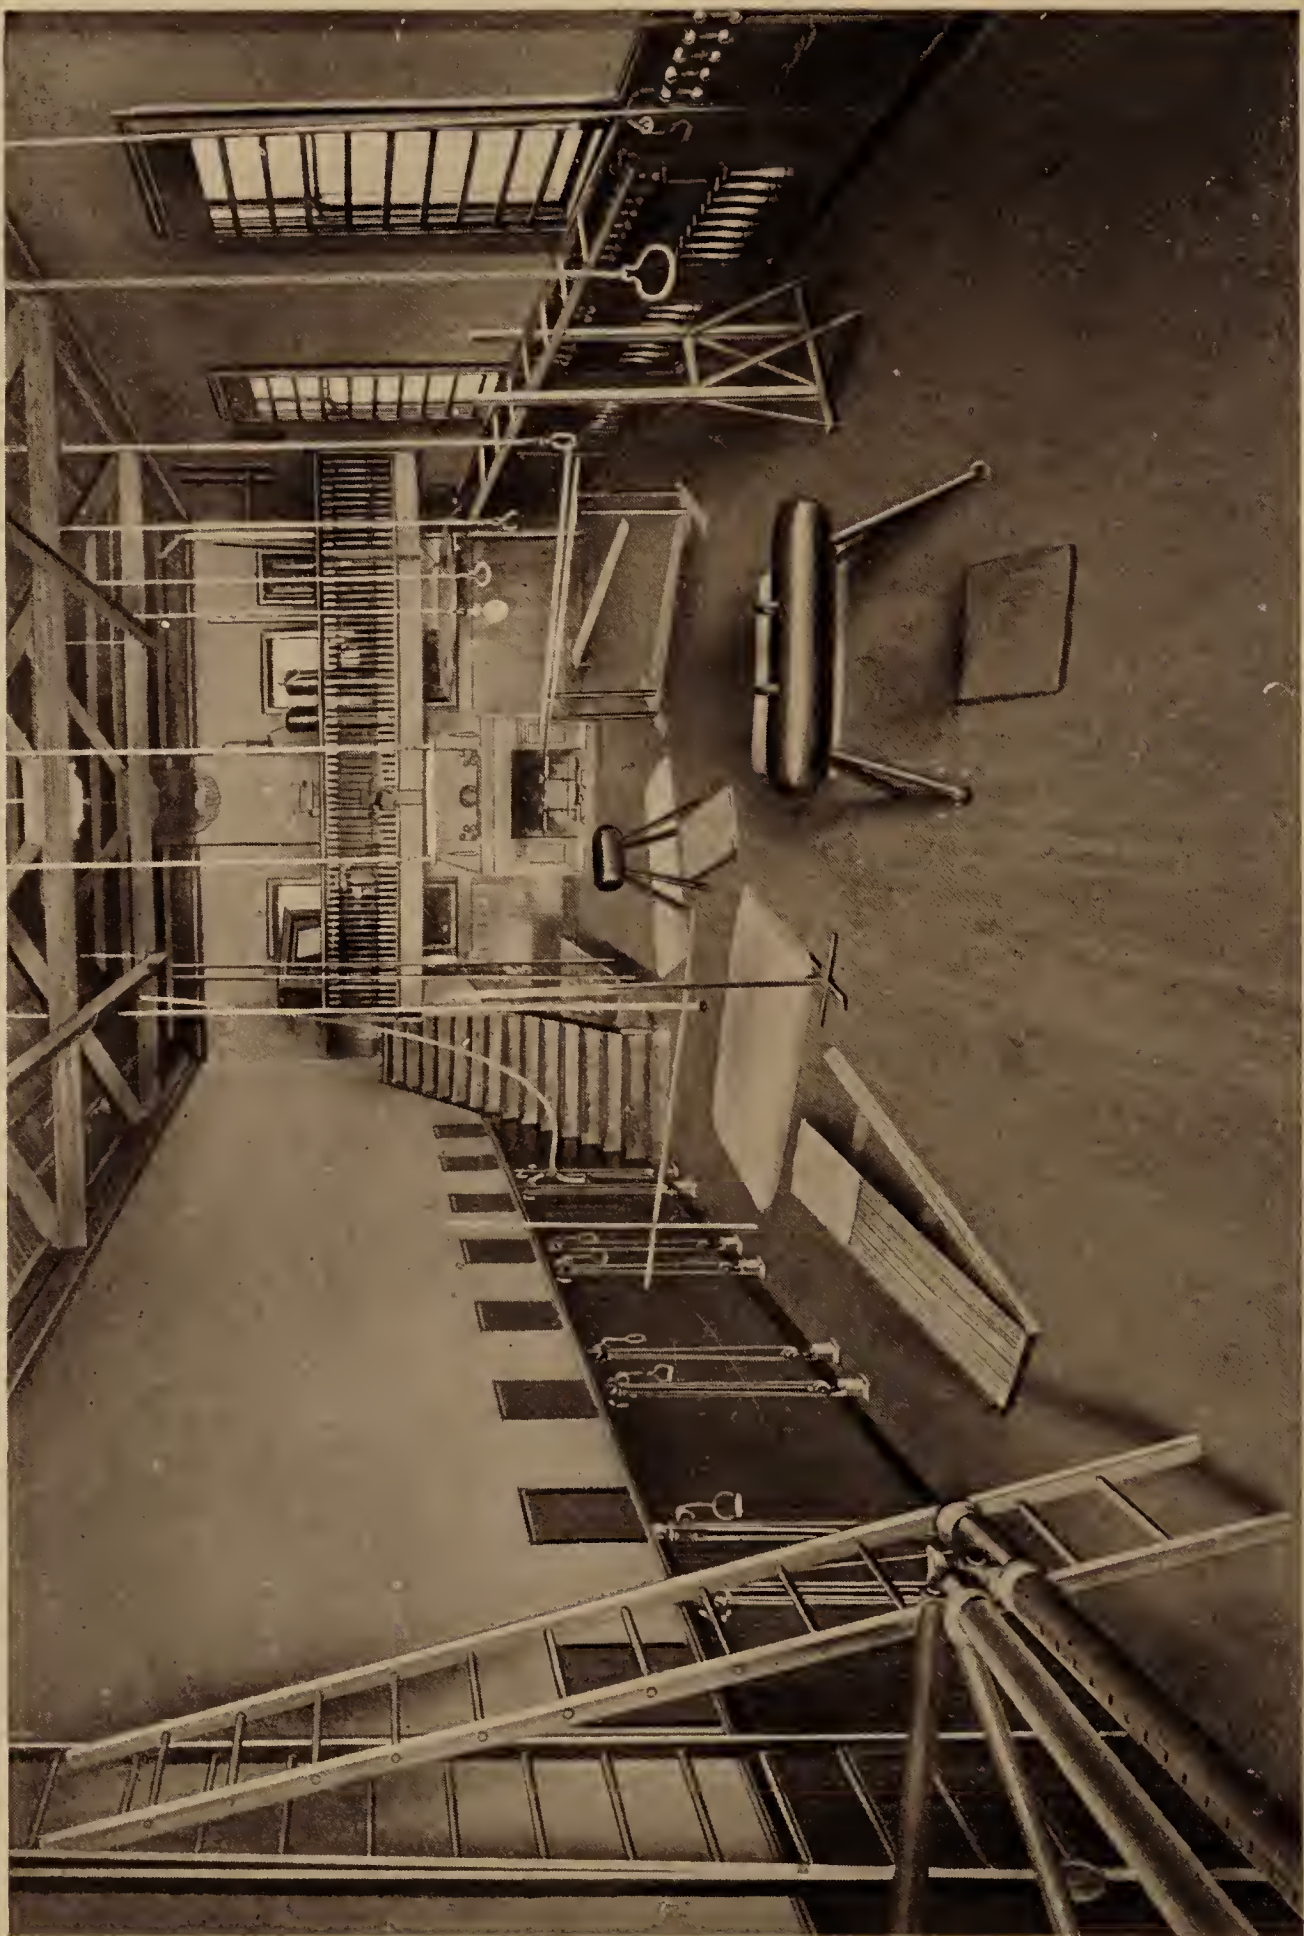

CHEMICAL LABORATORY

PHYSICAL LABORATORY

THE GYMNASIUM

## GYMNASIUMS

From Thanksgiving until spring, the gymnastic and athletic work of the school is carried on in the gymnasiums and on the adjacent playground.

Unless excused at a physician's request, all pupils are required to engage in both the regular, prescribed gymnastic work and the Country Club activities, as scheduled for them.

All pupils, with the exception of those in the primary grades, are required to wear regulation gymnasium suits. The costume for girls consists of black bloomers, white middy blouse, black tie, black stockings, and high, white, rubber-soled shoes. The suit for boys consists of sleeveless, white cotton athletic shirt, white running trunks, and white canvas shoes with rubber soles.

## COUNTRY CLUB

During the spring and fall, the gymnastic and athletic activities are carried on at the Country Club, 3901 Wisconsin Avenue, where the school controls extensive athletic fields and well-equipped playgrounds. There the older pupils have opportunities for basket-ball, baseball, football, volley ball, hockey, soccer, and track work. Interclass competitive games are stressed and interschool games, supervised by the coaches, are arranged for. The younger pupils enjoy games of simpler organization, and make use of sand boxes, swings, see-saws, sliding boards, giant strides, and such other apparatus as is found on well-equipped playgrounds.

The school owns and operates large and comfortable busses to provide convenient transportation from the school to the Country Club.

## SOCIAL ACTIVITIES

The school encourages wholesome social as well as athletic activities at the club and the school. The Suburban School with its dining-room, dressing-rooms and shower baths, affords excellent opportunities for picnics. The spacious living-room in the

club house furnishes opportunity for other social activities. Evening functions begin and end early.

The students work enthusiastically to support the Red Cross Roll Call, the Christmas Seal Sale, and the Children's Hospital.

## INSTRUCTION

The school employs teachers who have been trained in our best colleges and normal schools. They are men and women of strong character and pleasing personality. Each teaches what he is best qualified to teach. Interest is stimulated by the fact that pupils are taught by different teachers and in different rooms.

The course of study is flexible enough to regulate the work to the capacity and need of each pupil. It provides for the study of Latin and French in classes preceding the High School.

The number of pupils in classes varies according to the subject, and composition of the group. Each class is small enough for every member to enter actively into the work of each day and to receive a reasonable amount of individual attention; and at the same time is large enough to stimulate wholesome competition.

Pupils of average ability and application will receive all the help they need from their teachers. For students who are falling behind, the school arranges a special Saturday morning session for the completion of unfinished work.

There are times, however, when a tutor can be used to excellent advantage in helping a pupil to make up work after an illness, or to advance to a higher class when his age and intelligence would warrant it. In such cases, the school is prepared to recommend tutors.

Too much importance cannot be attached to regular hours for study at home. A pupil's progress depends largely upon continuous effort and faithful application. Pupils are therefore expected to do a reasonable amount of study at home. The amount of time which should be devoted to home study is mentioned on the reports issued every six weeks. Pupils who lack health and strength may omit the less essential studies.

THE LUNCH ROOM

CAFÉTERIA

When a pupil is detained at home by illness, the school will gladly furnish the lesson assignments for the following day, if the request is received before noon.

### PHYSICAL TRAINING

The Department of Physical Training aims through selected and supervised activities, in the gymnasium, on the playground, and on the athletic fields, to stimulate in all pupils interest in wholesome recreation, to promote health, and to develop a sense of fairness and honor in sportsmanship.

To safeguard the pupils, physical examinations are made at the beginning of the school year by the school physician and anthropometric measurements by the physical directors. Physical defects found are reported to the parents for treatment or corrective exercises.

The school will accept a certificate of physical examination by the family physician in place of the school examination.

Outdoor setting-up exercises are given daily to the pupils at the midmorning recess.

### HEALTH PRECAUTIONS

When there is a contagious disease in a family, the school should be notified immediately, and the children of that family should stay away from school until the attending physician gives a certificate stating that the laws of the Health Department of the District of Columbia have been complied with. Pupils of the school, even when immune, should keep away from homes where contagious diseases exist.

### SWIMMING

By arrangement with the Racquet Club, boys of the Intermediate and High Schools have the use of the pool under the supervision of teachers from the school and without charge. Similar opportunity is afforded the girls at the new pool of the Young Women's Christian Association, 17th and K Streets.

Instruction in swimming will be given if desired. Arrangements for such periods of instruction may be made at the office.

#### **AFTERNOON EXTENSION COURSES FOR PRIMARY AND INTERMEDIATE PUPILS**

Afternoon classes in carpentry and basketry for Primary and Intermediate pupils are conducted at the school during December, January, February, and March.

#### **ART AND MANUAL TRAINING**

The work includes freehand and mechanical drawing, painting, designing, clay modeling, wood-carving, and carpentry. The aim in teaching these courses is to develop in the pupil an elementary skill of hand and eye, and to cultivate a love for the beautiful in nature and a discriminating taste in art.

The work is correlated with all class subjects and school activities.

#### **THE SUBURBAN SCHOOL AND KINDERGARTEN**

The Suburban School, at the Friends School Country Club, 3901 Wisconsin Avenue, consists of a kindergarten and the first four grades, the course of study of the four grades paralleling the corresponding grades of the Friends School in the city. The building, situated on one of the highest elevations in the District, contains well-lighted schoolrooms, equipped with movable furniture. Cots are supplied, upon which pupils may enjoy an afternoon rest period preceding the supervised study hour. The lower floor of the building contains a carpentry shop, rest room, kitchen, and dining-room, where luncheons are served with special reference to the needs of young children. Seven acres of ground afford unusual opportunities for outdoor activities and nature study.

When desired, the school busses take the pupils to and from the Suburban School, where the daily session is from 9.10 A.M. to 2.10 P.M. and may be continued by special arrangement for children above the Second Primary until 4 P.M.

## KINDERGARTEN

The Kindergarten forms a connecting link between the home life and school life of the child. Through participation in its varied activities—songs, games, dramatization and the use of materials—the child finds happiness in co-operation with others, and opportunity for initiative and independence.

## LECTURES

Several rooms are arranged so that the stereopticons and motion picture machine may be used to illustrate lectures and talks on history, travel, geography, art, and science.

During the past year the following lectures have been given:

MR. DONALD M. MCNEALE, October 14, "*Paper Making.*"

MR. WILLIAM KNOWLES COOPER, November 11, "*Some Things Observed in Europe in 1927.*"

DR. META GLASS, President of Sweet Briar College, November 17, "*The Freedom of the Intellectual Life.*"

## HIGH SCHOOL

### GRADUATION

In the four years of the High School are taught all of the subjects required for admission to the Classical and Scientific departments of our most advanced men's and women's colleges and technical schools, besides such other subjects as are desirable for rounding out a High School education. Music and Art pursued under private instruction will be credited upon the fulfillment of the school's requirements.

The figure following each subject indicates the number of points it counts towards graduation. Eighty points are necessary to graduate, averaging twenty a year, and must include twenty of English and ten of Mathematics. In arranging his program each pupil should choose this amount, and, if going to college, see that his course includes the required subjects for admission; otherwise he may have to take an additional year of preparation. However excellent in substance, no written work in English will be considered satisfactory if seriously defective in punctuation, spelling, or other essentials of good usage. Candidates for graduation must remove all conditions on work preceding that of the year of graduation by February 1, and later conditions by April 15 of the year of graduation.

Pupils will be received at any time when there is a vacancy, and will be charged from the date of entrance to the end of the year.

A few students will be received by the month at one-fourth more than pro rata rates, but there must be a definite understanding at the time of entrance; otherwise the charge will be for the year.

Books and stationery may be bought at school. Stationery will not be charged except in the Primary Department. Books purchased before January 1 may be charged.

### GENERAL REGULATIONS

The school's attitude to its pupils is that of having faith in their intention to do right, and to practice the common courtesies of life. Although judicious oversight is exercised, the school believes that a child is best governed who, by the use of all reasonable freedom, is developing a sense of personal and social responsibility. To secure good order and good work, more depends on promoting good will and interest in school activities than on punitive or restrictive measures. The school's organization is not adapted to those who require severe restrictions and constant pressure in order to do good work or maintain satisfactory conduct. A pupil's frequent or persistent neglect of work or indifference in conduct results not in systematic penalties but in a request for his withdrawal.

A written excuse from the home is required for absence, tardiness, or early dismissal.

In the case of absence, pupils should make up lessons and examinations promptly. Credit will be given for this work when the absence is due to illness. A pupil who requires three or more hours of private instruction to make up work is expected to have a tutor's assistance.

Parents are requested not to call their children by telephone during school hours, except in cases of unforeseen need.

Pupils should not bring large sums of money or valuables to school. The funds of classes and other school organizations should be deposited in the office safe.

*Hats, coats, sweaters, umbrellas, overshoes, and gymnasium suits and shoes should be plainly marked with the owner's name.*

Girls need pockets in their dresses and purses small enough to be carried in them. Great annoyance is occasioned when money and valuables are mislaid by the students.

The use of tobacco is forbidden on the premises, athletic field, and wherever the school is represented.

Any damage beyond that resulting from proper use of premises, school furniture, apparatus, books, or property of other people will be repaired at the expense of the one causing it.

The right is reserved of requesting the withdrawal of a pupil who is indifferent to these important matters, or whose presence is a detriment to the school.

### OFFICE HOURS

During the school year, the office hours are from 9 A.M. to 4 P.M. Through June and from September 4 to the opening of school the secretary or one of the principals will be at the school from 10 A.M. to 12 M. and from 1.30 to 4.30 P.M. Correspondence during July and August may be directed to 1811 I Street, N.W., whence it will be forwarded if necessary. Early application is desirable. Telephone, Main 284.

MR. and MRS. THOMAS W. SIDWELL,

Residence, 3901 Wisconsin Avenue, N.W.

Telephone, Cleveland 953.
